

BATHROOM FITTINGS

PRODUCT CATALOGUE

WE'VE BEEN INSPIRING CONFIDENCE FOR 25 YEARS

BATHROOM EVOLUTION

Over the past quarter of a century, both the appearance and the function of bathrooms have changed. They have become rooms intended not only for hygiene, but also for relaxing and unwinding. Bathroom fittings now have to meet the constantly growing needs of users. This is why Deante's offer includes high quality products enabling you to set up a spa in the peace and quiet of your own home.

The comfort of using the bathrooms has been improved by shower columns and shower panels, as well as by the increasing popularity of flush-mounted systems. The latter allows individual elements to be custom-configured according to the users' requirements. The offer has additionally been extended to include products designed for small spaces, which means that less roomy bathrooms can be both elegant and comfortable.

Users are currently looking for products characterised by interesting design, ergonomics, water-saving features and longer lifespan. As we wish to meet the demands of our customers, we are constantly expanding our product range.

GOOD DESIGN

For 25 years we have been observing changes taking place on the bathroom fittings market. Combining our experience with a fresh look at interior fittings, we are keen to cooperate with Polish designers, whose original projects are a guarantee of unique designs and the painstaking attention to details.

The designed collections are appreciated not only by the customers, but also by recognised experts in interior industry competitions, such as Łazienka – Wybór Roku (Bathroom - Choice of the Year), Złote Ville (Golden Villas), Dobry Wzór (Good Design), Top Design Award, or Diament Meblarstwa (Diamond of the Furniture Industry).

We also support local initiatives promoting utility design, including years of collaboration with The Academy of Fine Arts (ASP) in Łódź and participation at the Łódź Design Festival - one of the largest and most important festivals devoted to design in Poland.

EXPERIENCE WHICH OBLIGES

Deante is a brand created from 100% Polish capital and offering high quality bathroom and kitchen fitting products.

What makes us stand out is the comprehensiveness of the offer - stylistically and functionally consistent families of products in the fields of sink fittings, shower columns, flush-mounted systems, shower panels, shower sets, shower cabins and ceramics. All of our local and foreign suppliers have been verified in terms of quality and our extensive system of internal control is an added guarantee of the highest quality of our products.

A RELIABLE COMPANY

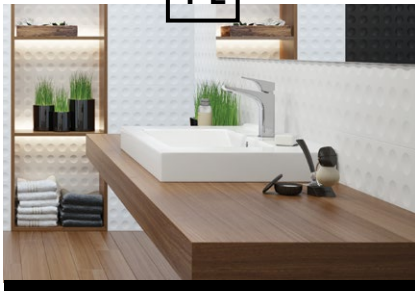

Deante operates successfully on the Polish products market and also functions robustly abroad, supplying its products to countries such as Sweden, Norway, Germany, France, Czech Republic, Slovakia, Hungary, Romania, Bulgaria, Russia, Ukraine and New Zealand. We collaborate with trusted showrooms and shops where customers can count on professional service. One of the company's priorities is to provide assistance through a reliable maintenance network and efficient warranty and post warranty service.

In response to the needs and expectations of our trading partners and individual customers, Deante has created a new website. It's modernised version is an excellent source of knowledge and inspiration supplying advice and photos. It is organised in a clear and intuitive way to help the users search for data concerning individual products or assortment groups and download materials in the form of catalogues, photos or technical drawings. We have also prepared a base of 3D files for professionals, which makes it possible to create visualisations with Deante products. One of the newly introduced features are 360 degree photographs of bath mixers, shower mixers and shower panels, which show individual models from each side.

A consistently implemented trading policy has brought an impressive result - during the 25 years of our company's operations, over 18m Deante group products have reached our customers. The trust that has been put in us is an obligation, and at the same time a challenge for the years to come...

FEATURES

of the bathroom mixers

* more details about warranty conditions at www.deante.eu

BATHROOM MIXERS

KAMELIA MIXER

QUALITY

Deante mixers are made from high class material. M059 brass provides the appropriate tenacity, ensures resistance to corrosion and has excellent casting properties. In addition, the mixers are equipped with ceramic cartridges, which guarantee durability, proper functioning and watertightness.

PROECO PHILOSOPHY

Limited water consumption thanks to thermostatic technology, a two-step handle system (eco-click) and fast-reaction cartridges.

DESIGN

We place importance on exceptional projects and Polish designers, which is why Deante guarantees unique designs.

GUARANTEE

We grant a seven year warranty on all our mixers, covering the watertightness of the body and proper functioning of the ceramic cartridges.

MINIMAL

- geometrical shapes of the fittings give the bathroom a modern feel with a touch of exclusivity
- simple in form with sharp lines and parallel planes

COLLECTION

Hiacynt series is an exceptional collection, designed with great attention to the smallest detail. Małgorzata Płoskońska, the author of the series, has enclosed modern lines in timeless forms. Balanced slope angles, discreet curvatures and elaborate ovals create a consistent whole.

HIACYNT

- the Hiacynt collection is characterised by its dynamic form
- movable aerator recessed in the body helps to precisely direct the stream of water
- washbasin mixers are equipped with the eco-click system- a two-step handle opening which reduces water consumption by 50%

FEATURES

of the thermostatic
and sensor mixers

THERMOSTATIC AND SENSOR MIXERS

LOBELIA FLUSH-MOUNTED SET

SAFETY

Thermostatic mixers are safe to use since they lower the risk of scalding by mechanically blocking the flow of water hotter than 38°C. This is why they are a perfect solution for children and the elderly.

PROECO PHILOSOPHY

Deante thermostatic and sensor mixers help in taking care of the environment. Mixers with a proximity sensor opening and closing the water flow for a specified time can reduce water consumption by up to 50%. Thermostats are both economical and ecological. Permanent temperature adjustment at 38°C helps to save water.

COMFORT

Thermostatic mixers can set the water temperature at the optimum level eliminating the necessity of its adjustment each time.

SHOWERS

DALIA SHOWER SET

QUALITY AND COMFORT

Deante shower products have conveniences which result in high quality and comfort of use.

The anti-calc system present in all shower sets and hand showers helps to remove the limescale in a quick and easy way. Shower hoses with brass nuts are more durable and their increased tensile strength makes them more extensible. The anti-twist system prevents the hose from twisting while in use.

TYPES OF STREAMS

-  gush – restores, regenerates
-  soft – relaxes, calms
-  rain – refreshes, reinvigorates
-  hydromassage – toughens, stimulates
-  cascade – refreshes, cares
-  mist – fogs, cools

PROECO PHILOSOPHY

Certain products include functions helping to save water. A special flange in the shower hoses reduces water consumption to 6 l/min. The eco function in hand showers minimises the water flow, reducing the consumption of water by up to 50%.

NCQ 051K

- 770 mm brass sliding bar
- big chrome plated soap shelf with brass chrome plated hooks
- 5-function hand shower of 120 mm in diameter
- 1700 mm-long extensible stainless steel hose

NCW 051K

- 800 mm metal sliding bar
- acrylic soap dish
- 116x116 mm 3-function hand shower
- 1700 mm-long extensible stainless steel hose

INDUSTRIO PANEL

ANTI-CALC SYSTEM

A system which enables quick and easy removal of limescale which gathers in the nozzles. It is present in all shower heads and hand showers.

TYPES OF STREAMS

-  gush – restores, regenerates
-  soft – relaxes, calms
-  rain – refreshes, reinvigorates
-  hydromassage – toughens, stimulates
-  cascade – refreshes, cares
-  mist – fogs, cools

PROECO PHILOSOPHY

The thermostatic mixers used in the panels and shower columns ensure lower consumption of hot water and savings of the energy needed to heat it.

FLUSH-MOUNTED SYSTEMS

CASCADE SHOWER SET

MINIMALISM

Deante flush-mounted products are at their best in modern spaces, fitting in with current trends. These enable uncluttered bathroom arrangements to be created, where all the elements are concealed.

FUNCTIONALITY

Flush-mounted products make it possible to compose sets adapted to the needs and likes of users. They also enable space to be saved in the narrow confines of the bathroom and are easy to keep clean.

QUALITY

Deante flush-mounted products are produced from the highest quality materials. The brass which the mixers are made from and the ceramic cartridges which are their most important parts guarantee the longevity of bathroom fittings.

CABINS, DOORS, SHOWER TRAYS, DRAINS

KERRIA CABIN

QUALITY

Deante shower cabins, shower trays and linear drains are manufactured in line with European and Polish standards:

PN-EN 14428 – shower cabins
PN-EN 12150-1 – safe tempered glass
PN-EN 14527 – shower trays for domestic use
PN-EN 1253:2005 – linear drains

We produce all our cabins using safe tempered glass attested in Poland by the Institute of Ceramics and Building Materials (a certified research unit of PKN - the Polish Committee for Standardisation). The glass has a safety certificate.

ACTIVE COVER

ACTIVE COVER

Cabins in the Abelia, Kerria, Cubic, Vanilla, Vigo and Moon series are available with an Active Cover coating, which has been created in order to make the cabins easier to keep clean. The surface of the glass is covered with a coating which repels water particles, which means that dirt, soap and water flow off faster.

GUARANTEE

We issue a 2-year warranty on all shower cabins and shower trays.

Linear drains are covered by a 10-year warranty period.

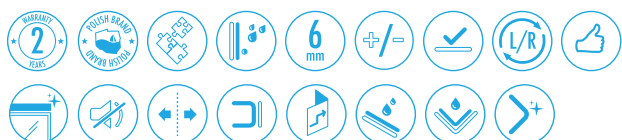

CUBIC

SQUARE SHOWER CABIN

KTI 043P / KTI 044P

- dimensions: 900x1950 mm / 800x1950 mm
- glass: transparent
- 6 mm tempered safe glass
- upper support bar
- finishing: chrome
- a set of hinges for mounting on the right or left side
- can be installed without a tray
- special aluminum threshold profile
- special construction of the hinges with lift-up mechanism
- with waste water draining

BATHROOM CERAMICS

DALIA WASHBASIN

COMFORT

Deante washbasins are available in various shapes and dimensions, which means they can be suited to almost every interior. Toilet bowls are characterised by ergonomic shapes, so that they can be installed even in small bathroom spaces.

GUARANTEE

Deante ceramic products are covered by a 10 year warranty.

QUALITY

Deante washbasins and toilet bowls are distinguished by their excellent quality visible in the painstaking, smooth finishing and distinctive white colour of the enamel.

CDE 6ZPW

- dimensions: 350x510x310 mm
- as a set with a soft close toilet seat
- without rims

PEONIA ZERO

SOFT CLOSE TOILET SEAT

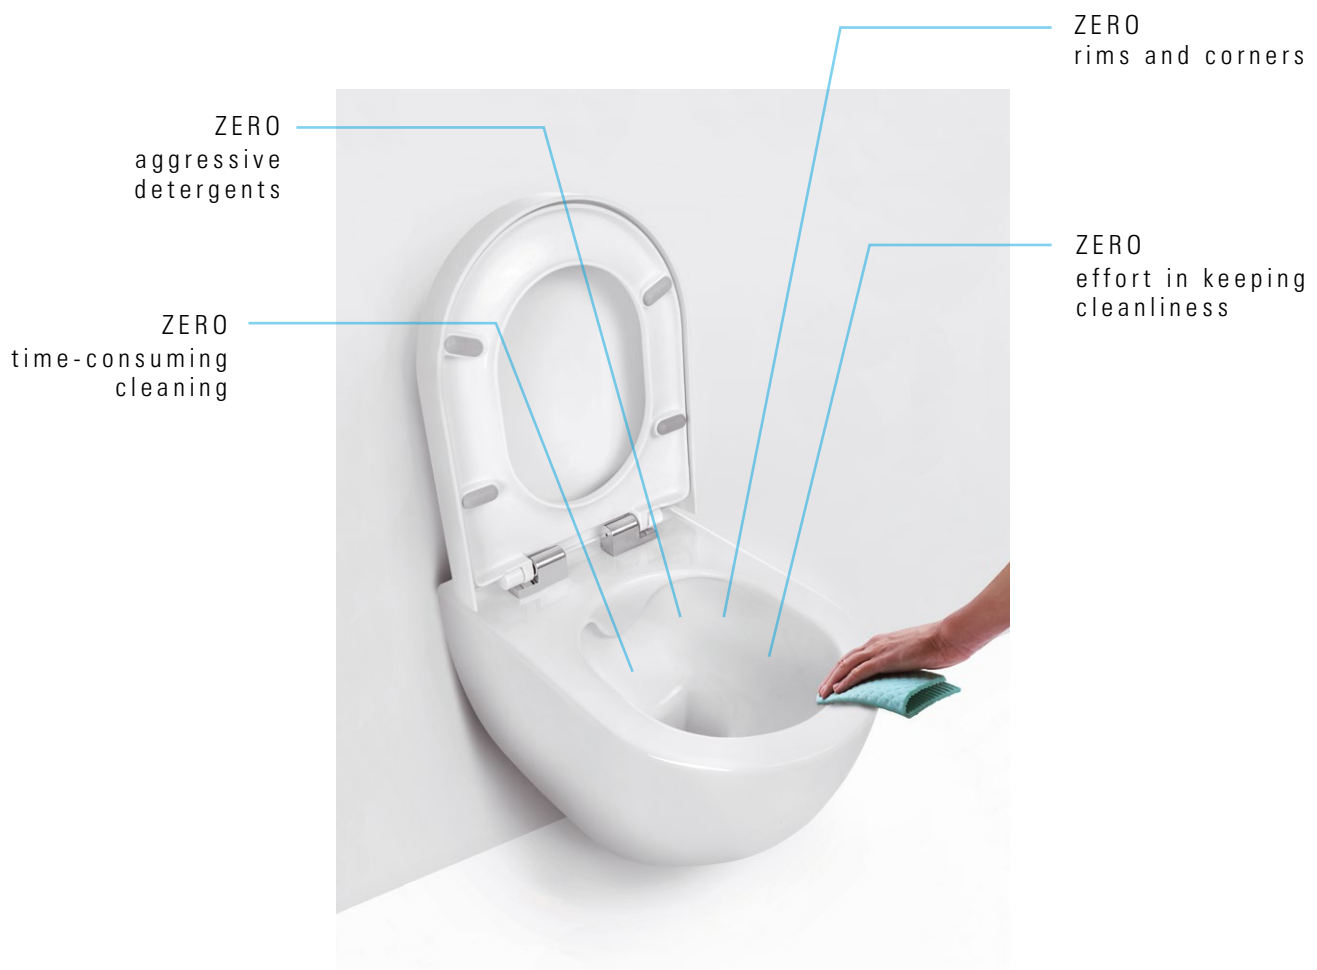

CDE 6Z0Z

- material: duroplast
- metal chrome plated hinges

An innovative, streamlined shape of the toilet bowl's inside lets you maintain cleanliness without the need of using aggressive detergents and time-consuming scrubbing of hard to reach corners. Smooth, rim-off surface can simply be wiped with a soft cloth. Peonia ZERO has been designed in a way that lets the water rinse the toilet bowl in a very precise way. The use of 2,5-4 liters of water is enough to effectively flush the toilet. This eco-friendly solution helps to save valuable resources.

Peonia ZERO stands out for its interesting, oval shape with concealed fixing system which has a great impact on aesthetic and product functionality. Lack of mounting holes and at the same time lack of corners makes keeping hygiene much easier.

PEONIA

WALL-MOUNTED TOILET BOWL

PRODUCTS FOR DISABLED PEOPLE

VITAL GRAB BAR

COMFORT

Deante accessories are a perfect solution for people who have problems with moving around. They minimise the need to use other people's help, which affects everyday comfort.

SAFETY

Proper arrangement of bathroom equipment improves the safety of people with motor disfunctions. Deante seats and grab bars make it much easier to use the washbasin, shower, bath or toilet.

FUNCTIONALITY

Seats and grab bars should be adapted to the needs of users and to the bathroom space. Accessories which can be folded up by the wall will be most convenient in small rooms.

VITAL
