 German  
Quality  
since 1912

The company is managed in the fourth and fifth generation by Peter Hamberger and his son Dr. Peter M. Hamberger.

## No. 1 in Europe. With 100 years' experience.

Our family began to produce WC seats in 1912. Our production today as Hamberger Sanitary under the HARO brand name is the result of a unique company history. More than one hundred years of experience is channelled into our current products – a crucial reason for our exceptional standing in the market.

We have evolved into the biggest producer of WC seats in Europe through our continuous innovations, uncompromising quality, and determined customer focus. Be it design or comfort, hygiene or function, we have the right solution for every application!

But there's more! Hamberger Sanitary is today a family company with approx. 1,800 employees. We don't just understand our obligations to our customers – we also know what

the environment, society and our employees ask of us and what they mean to us. We are more than happy to meet this responsibility. The major challenges posed for us all are best faced when we act sustainably – and in harmony with all involved!

# TRADITION

## Is rattling simply part of it all? Not with us it isn't!

Hamberger Sanitary has been setting standards in bathrooms and toilets for more than ten years with the SoftClose® automatic closing system. One light touch is enough for the WC seat to gently and quietly close automatically. A convenience you wouldn't want to lose out on!

We have continuously optimised this ground-breaking technology. The experience gained with SoftClose® classic has now been incorporated into the development of a completely new system: SoftClose® pure, the model for the price-conscious customer. Put to the test numerous times over, this system guarantees the same reliability and longevity as the SoftClose® classic.

SOFT  CLOSE®  
classic

The leading automatic closing system:

- Sturdy with long-life
- Unequalled comfort
- TakeOff® hinges

SOFT  CLOSE®  
pure

The new trendsetter:

- Innovative and budget-friendly

It just doesn't get more comfortable! The SoftClose® automatic closing system closes the seat with a touch of the finger – soft and sturdy.

# SOFTCLOSE

## Small details make a big difference. With hygiene, for example.

Perfect cleanliness and hygiene in hard to reach spots: it's not magic – it is the result of our innovative TakeOff® technology.

A milestone 10 years ago, this hinge technology is still the benchmark today.

The entire WC seat is removed from the hinges in just one movement.

And no tools are required! Once the ceramic and the WC seat are cleaned you simply push the seat back on again. One click – and you're done.

The WC seat can be taken off in one movement for cleaning. That's what perfect hygiene is all about!

TAKE   OFF®

# TAKEOFF

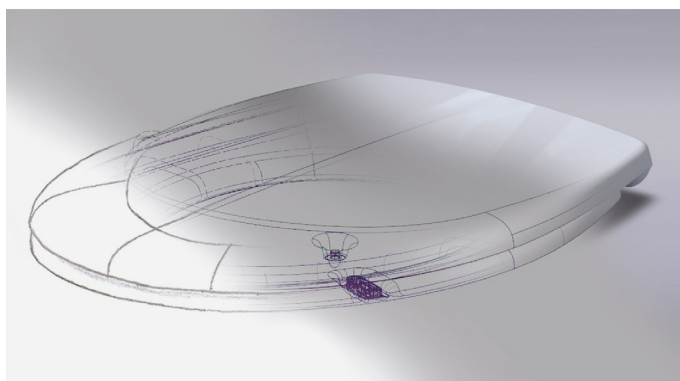

## Form follows function. Some models are already real design classics.

One WC seat is not the same as the next! Because only when the design is right can a toilet seat fit well into a bathroom's overall look.

And that's why we frequently also draw on trends from the world of architecture and interior design: purism and rectilinearity, which shape today's style sensitivities, are also included in many of our models. We constantly interpret the design topic in a holistic manner here: And it's not just about colours and shapes – feel is also important, with finely polished cor-

ners or the impressively successful buffer integration, for example. The shape of the seat ring must also guarantee perfect ergonomics. Thanks to this philosophy,

some of our models have already become design classics or have won awards at international design competitions, such as reddot and DesignPlus.

## There's always lots going on in the bathroom. HARO WC seats do it all!

In addition to hygiene and ease of installation, comfort and design are especially important in domestic applications. We have Europe's largest model range with almost 300 different shapes. Whatever the style, what-

ever the personal taste, there are endless options for all. With the materials, Duroplast or Thermo-plast, with SoftClose® or TakeOff® technology, classically elegant in design, puristic or stylish and natural in exactly the right tones to provide the right ambience for your requirements.

And of course this applies for both first purchases and when you want to replace your WC seat after a few years. We guarantee long-term product availability.

A customised product solution? No problem with HARO's product specifications.

## Anyone planning public projects bears a special responsibility. Which is why we are their ideal partner.

The contract market demands the highest requirements. Not just with function, durability and hygiene – but also with economic efficiency.

So why do so many companies, hotels, and public institutions trust in HARO? It's quite simple!

Our public sector WC seats are so durable, easy to maintain and extremely hygienic that they defy even the toughest everyday situations. And they stay sturdy – even after really long use: thanks to their special contouring, the Du-roplast material, and high-stability stainless steel hinges. And this, let's not forget, also contributes to economic efficiency!

The entire package is rounded off with a perfected service, whereby we provide planners with extensive documents early on for the tender. And we also deliver "branded" versions for hotels, etc.

You have the choice – we have the selection! You will find the entire HARO model range at [www.haro-sanitary.com](http://www.haro-sanitary.com) or directly via the QR code shown here.

## Nobody's getting any younger. Which is why our seats offer an evolution of function.

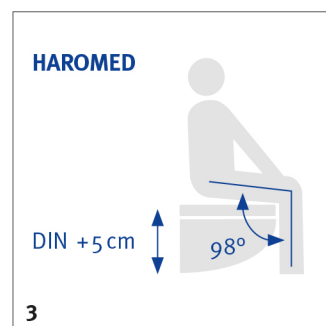

Anyone who depends on a little help in their everyday life knows the details that make a toilet seat especially age-friendly: suddenly the raised seat position, stable seat buffers for side to side support or an especially cleaning-friendly underside are important issues. Our careline models do all this – and so much more:

Features include high-durability SolidFix® hinges, the antibacterial ActiveShield® and the SoftClose® automatic closing system with

the Haromed model. We also place great value here on appealing design, as we do with all other models.

1 Practical details make the difference. And make everyday life easier!

2 100% lateral support with special seat buffers.

3 More comfortable seating angle with higher sitting position with the Haromed.

4 The full length hinge bar ensures even more stability.

You have the choice – we have the selection! You will find the entire HARO model range at [www.haro-sanitary.com](http://www.haro-sanitary.com) or directly via the QR code shown here.

HARO Plus 23

Haromed Basic

Set by hand  
with SWAROVSKI  
ELEMENTS.

## Special requests deserve to be fulfilled.

A statement that today covers almost all design areas. A product range must be appropriately versatile to prove itself on the market.

HARO has always pursued the principle of attending to individual taste as closely as possible. This means a model range that includes both trendy colours and nostalgic vintage shades, that co-

vers puristic forms just as much as it does imaginative extravagances. Whose spectrum covers sparkling SWAROVSKI ELEMENTS to favourably priced material alternatives,

such as Thermoplast. And which combines all this with practically every functional element. That's exactly why every wish is guaranteed to be fulfilled.

Thermoplast is elastic and therefore especially durable, tough and break-resistant.

**HARO®**

# SPECTRUM

## There are many good materials. But only one is called Duroplast.

We make no compromise with materials. The raw material is already subjected to stringent quality checks – and we only use what meets our high demands! First and foremost, this is Duroplast, an unbeatable material in many respects.

Optically Duroplast looks almost exactly like a premium ceramic.

The smooth surface in particular denotes the best possible quality. But this top material also shines with its inner qualities. Duroplast is so tough, hard-wearing and long-life that, even after long years of use, our WC seats do not lose any of their advantages. And because it is completely pore-free, it also sets exceptional standards in hygiene.

Preventative hygiene with Active-Shield®: With our careline models, antibodies assimilated in the plastic reliably prevent the formation and spread of germs and bacteria and is based on a safe inorganic formulation to which germs cannot build up resistance.

# MATERIAL

HARO Duroplast WC Seats do not contain any environment-damaging materials and are consequently also skin-friendly.

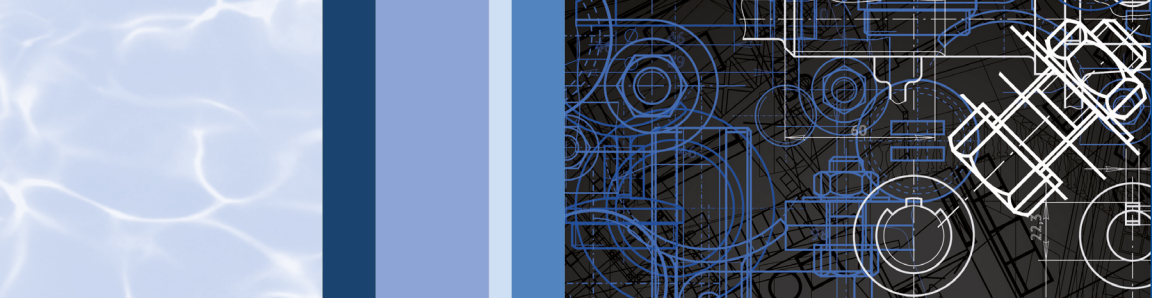

HARO Duroplast WC Seats are resistant to scratches under normal household conditions.

HARO Duroplast WC Seats are easy to clean, and with their closed pore-free surface (with proper care), offer the best conditions for optimum hygiene.

HARO Duroplast WC Seats are very durable, hard-wearing and long-life.

**HARO®**

# TECHNICS

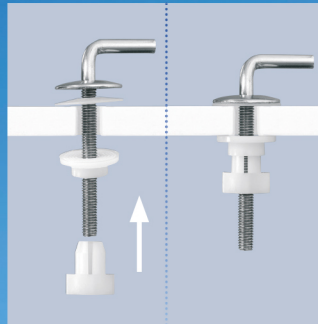

## 350 hinges. And all do what they claim to do.

The backbone of every toilet seat is the hinge. That's why we pay special attention to this topic and can demonstrate our love for detail. The result is more than 350 different hinges, all produced in our own factory and predominantly with rust-free V2A stainless steel. Or to put it another way: the right solution for every conceivable application! Consequently,

there is hardly a ceramic around today that cannot be combined with one of our top quality WC seats. Fixing systems as simple as

they are innovative, ensure adjustment difficulties are ruled out – for both for the look, and the correct fit.

### FAST FIX

Attach, push up, tighten – three moves to fix in record time (see large photo on left)

### EX CENTER

The highest possible flexibility with the ability to shift in four directions – adjustment meets perfection (see large photo on left)

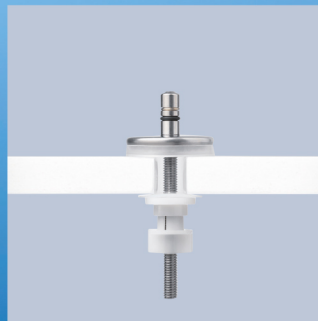

### EASY FIX®

Many modern ceramics are no longer accessible from below – with EasyFix® you simply fix from above.

### SOLID FIX®

No more wobbling here! SolidFix® guarantees a rock steady fix.

### TAKE OFF®

Easy „on and off“ with the TakeOff® hygienic system.

### TopFix

Ingeniously simple – simply ingenious: the smart hinge solution for fixing from above.

# HARO®

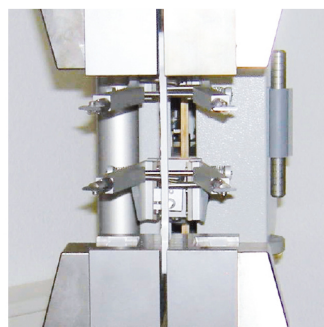

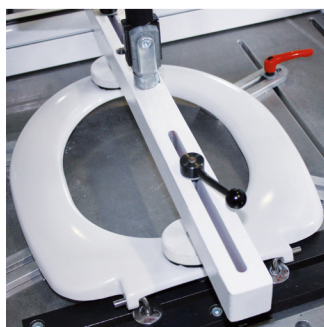

## We don't just talk about quality. We prove it as well!

Anyone producing top quality products must anticipate every risk, which is why our quality assurance is especially rigorous. Intricate material tests rule out all material defects; every component endures realistic endurance tests. This input and expenditure has rewarded us with numerous cer-

tificates and awards; it is the prerequisite for wide-ranging warranties.

Needless to say our seats meet the European Standards (DIN EN 33, 34, 37, 38) and are tested in accordance with DIN 19516. Our production sites are also certified as a matter of course in accordance with ISO 9001. But ecologically sustainable production is, of course, also

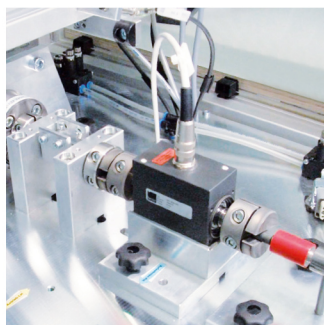

a top quality factor in today's world. We have set the course in this respect: in selecting and handling natural resources in a responsible manner. We feel obliged to ensure these values are maintained, both in our European production sites and worldwide.

Every HARO toilet seat is subjected to uncompromising stress and breakage tests before being released for final production.

# QUALITY

Hamberger Sanitary GmbH has been awarded the DIN EN ISO 9001 certificate of quality.

Hamberger Sanitary GmbH's environmental management is certified in accordance with DIN EN ISO 14001.

HARO WC seats are tested in accordance with DIN 19516.
